

KINETIC SAND RECIPE

1 Cup of Sand

1 TBS Cornstarch

1 TBS Dish Soap

Tiny bit of Water (You may not need any water because the sand may already be wet enough.)

OPTIONAL Food Coloring

OPTIONAL - 1 TBS Washable Elmer's Clear Glue – If you want your sand to “flow” like store-bought kinetic sand, then add the glue but BE CAREFUL where you play with your sand. You do not want to leave a mess.

Mix 1 cup of sand and 1 TBS cornstarch. Mix. Add 1 TBS dish soap. Mix again. Add tiny bit of water only if dry. Mix. Let it set for several hours. Enjoy!!
